SKILLS

Backend development

Extensive experience with C-family languages and Python, gained mostly through personal projects ranging from simple Java games to an entire 3D rendering engine.

Frontend development

Hands-on experience across web design, from layout to interactivity.

Database management

Primarily experienced with NoSQL database systems, while also familiar with the essentials of both the theory and practical implementation of RDBMS.

CAD & 3D modelling

Experience with both aesthetic and functional 3D modelling. Projects include costume jewellery, functional instrument parts, cosplay accessories, replicas of busts, and geared mechanisms.

CNC operation and programming

Hands-on experience with CNC machines, including woodcarving and aluminium machining.

Microsoft Office

Basic proficiency in all Office programs. While still in high school, I used Excel on behalf of my father to summarise and model future sales for VodaVoda and Philip Morris International.

Miscellaneous

Other skills and interests include graphic design, $\text{\LaTeX}$, creative writing, repairing faulty electronics and manual woodworking.

FORMAL WORK EXPERIENCE

None.

EDUCATION

Bachelor of Science in Computer Science

University of Belgrade, Faculty of Mathematics / 2023 – Present

CERTIFICATIONS

Java Fundamentals Certification 2020

Cisco Networking Essentials 2019

PROJECTS

3D rendering engine

Personal project / 2021

A C# Windows Forms application built from the ground up, and quite ambitious for a high-school project.

OpenGL interactive scene

University project / 2026

My most recent project: an interactive OpenGL render made for a university course. It can be found in its entirety, along with many of my other projects, on my website.
